

Date:

Wednesday Challenge Form

Group Members: Hunter, Moses, Will

Problem Statement: Create a cool mentor's gift for the team 589

Approach:

For my model, I really wanted to commemorate the moment when 589 this year felt closer as a team, and how I wanted to still make it look customizable to the multiple divisions in our robotics team this year. It was a very simple model I assure you, but I felt it was probably the most metaphoric and the most simple of the design, but I wanted it too keep true too 589

Solution: Miles team created a lamp that carved 589. It was cool, simple, and memorable.

Lessons Learned: Make sure to make something metaphoric and memorable at the same time
